Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3744

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, 12, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by either Svanoe '972 or Svanoe '058. Both Svanoe patents disclose the method of continuously producing a suspension of ice particles in a solution via turbulation of an overcooled solution. The step of claim 2 is considered to be inherently met by the Svanoe patents. Also, it is noted that the cavitation mode of operation has not been positively defined in the claims.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 13, 15, and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Svanoe '972 in view of Goldstein or Svanoe '058 in view of Goldstein. Both Svanoe patents are considered to disclose the claimed invention except for the hollow rotor. Goldstein teaches a freezing machine which uses a hollow rotor 90. It would be obvious to substitute, for the rotor of either Svanoe patent, a hollow rotor of the type taught by Goldstein, for the purpose of more accurately scouring the walls of the freezing chamber.
